About The Program
Are you ready to achieve greatness and master self? Are you ready to build a legacy that reflects who you are?

The Black executive’s experience is riddled with complexity and challenges that ultimately contribute to some of the greatest American stories of triumph. Black executives’ journeys to the C-suite are unique, but all require a high proficiency in key skills such as innovating, responding to change, developing strategy, and maintaining the sheer determination needed to forge a path. This five-day leadership experience will touch the heart, challenge the mind, and give Black executives the tools to cultivate self and lead others. This leadership experience explores the psychology of the black corporate climb. It is time to support each other, challenge each other, and cultivate each other to come to new conclusions about what is possible both now and in the future.

Learning Objectives
Learning objectives provide the foundation for training development. Terminal and Enabling objectives provide a framework that organizes the course content, instructional activities, and assessments. The Terminal Objective describes the learning achieved by completing the overall course, while Enabling Objectives describe learning achieved with specific segments of the course.

TARGETED LEADERSHIP COMPETENCIES
